🌐 Ilijan Militar

Profile

Frontend Developer with 5+ years of experience building high-performance fintech and trading platforms using Angular, React, and TypeScript. Specialized in CRM systems, real-time trading interfaces, financial reporting modules, and risk monitoring dashboards. Strong expertise in WebSocket integrations, data-intensive UI optimization, and modular frontend architecture. Experienced in developing scalable systems for regulated financial environments.

WORK EXPERIENCE

Frontend Developer

FXGT | [link](#) 🔗

07/2025 – Present

- Developing and maintaining internal CRM platform using Angular
- Building and enhancing TradeManager platform using React.js with modern functional components and hooks
- Implementing real-time trading features using WebSocket integrations.
- Designing scalable component architecture for high-frequency financial data.

Frontend Developer

Nenergy | [link](#) 🔗

06/2024 – Present | Remote | Part Time

- Developed a blog management application using Angular (frontend) and .NET C# (backend).
- Designed and implemented full-stack features including content creation, editing workflows, and API integrations.
- Built scalable REST APIs using .NET for content management and publishing.
- Contributed to the development of NenFlow platform (<https://nenflow.com/> 🔗) as a frontend developer.
- Implemented reusable Angular components and improved UI consistency across the application.
- Collaborated with cross-functional teams in an international environment

Front End Developer

Dassom Digital | [link](#) 🔗

07/2024 – 07/2025 | Remote

- Contributed to Finance Automation Portal for eToro using Angular and React.
- Developed Client Money Reconciliation (CMR) modules ensuring compliance with financial regulations.
- Built PSP (Payment Service Provider) systems transforming raw financial data through structured data pipelines.
- Designed modular dynamic reporting systems for financial analytics and audit tracking
- Improved frontend maintainability through reusable components and modular architecture.

Front End Developer

Felicons DOO | [link](#) 🔗

12/2022 – 07/2024 | Belgrade, Serbia

- Developed Risk Exposure Monitoring software with real-time financial data visualization.
- Implemented WebSocket-based live data streaming for trading dashboards.
- Built interactive filtering systems for risk analysis tools.
- Learning new technologies (C#, NET)
- Contributed to FXGT trading platform interfaces supporting forex and crypto markets.

SKILLS

Angular 2+

React.js

TypeScript
